

This comment regards the proposal to expand the use of LPFM. I am not in favor of this expansion. I listen very frequently to the radio network K-LOVE. It is my understanding that the expanded use of LPFM may impact my ability to listen to this station. K-LOVE provides me with much-needed information regarding events in my community. It fulfills an important role in this area. If K-LOVE's signal were to be displaced by an LPFM broadcaster, this area would lose not only important local information, but access to national happenings as well. K-LOVE provides family-friendly music, news and other information that is increasingly difficult to find. The impact on my community would be terrible if K-LOVE's signal were to be displaced. K-LOVE offers a highly desirable service to the public in the type of programming it offers. I ask you to consider the negative effects that the proposal to expand LPFM services would have on the Bellevue-Omaha areas. I am against any changes that may limit my ability to listen to K-LOVE. Thank you for your consideration.
